You are to create a short "choose your own adventure story" on a single page. You are going to use JavaScript to make choices, access the DOM, and print something out. It should have a title, the story, and at least the three progressions in the story. Please add images, colors, fonts, etc. via CSS to set the scene.

Specifics:

1. Use if statements
2. Use variables
3. Use function(s)
4. Use addition or concatenation
5. Have at least three choices in your story
6. Include images, colors, and fonts to your story via external CSS sheet
7. Each choice should update something in the DOM
8. You will need to use the onclick event. Here is a resource to help. onclick

Please save your work and upload it to your repository. You will continue working on this next week.

Please include a readme that discusses your successes, challenges, and how you overcame them.
